3 years

Individual entrepreneur Nikitin G.N.
Saint Petersburg

Web developer

Website developing, SPA. Work experience with foreign clients (UpWork/oDesk) and large companies (Alfa Bank, VTB, Gazprom) in the Agile team. Working as IP (as a remote employee under a work contract (contractor))

Main directions:
1. Development on React + Redux (SPA), Experience 2 years. (over 8 huge apps implemented)
2. Website development on HTML5 / CSS3 / JavaScript + CMS WordPress / Joomla / Drupal / Bitrix from scratch.
3. Development of enterprise security systems, threat analysis.

GitHub repository: https://github.com/progryx/

Experience in a large development team (CSSSR / Orbita Center) with high-load projects of large companies, time tracking, SCRUM + AGILE, version control (GIT / GitHub / GitLab), microservice development.

Last 3 SPA projects:

1. Microservices and multi-platform application for customers of the company.
Main stack: React 16.13 + TypeScript 4.0 + Lerna (monorepo) / HTML5 / CSS (LESS) + Grid layout / REST API
Responsibilities: Development of components and creation of a new microservice from scratch, integration into an application, work with a large mono-repository (more than 10 internal applications) using new technologies of the Webpack 5 (Module federation), writing tests (+ over 80%+ coverage)

2. Application for working with statistics.
Main stack: React 16.9 + TypeScript / HTML5 / CSS (PostCSS) + Grid layout / GraphQL
Responsibilities: Development / refinement of libraries, integration of components, versioning of the project

3. A toolbar for buisness management.
Main stack: React 16.8 + TypeScript / Redux / Redux-saga / HTML5 / CSS (LESS) + Grid layout / REST API
Responsibilities: Component development, integration of internal library widgets, connecting components to the API, support and update of the existing application structure (legacy refactoring, bug fixing)

Last MPA project: https://utm.cr. Developing website from scratch for the union of Costa Rican musicians.
Main stack: Joomla CMS (PHP/JS), Apache, HTML5 / CSS (LESS) + Flexbox
Responsibilities: Developing all website from scratch based on PSD mockups, developing additive modules (slider, filter etc.)

Last information security project: Developing of recommendations for ensuring information security during test of company automated system.
Company: Ltd. Torgovy Mir
Responsibilities: Automated system analysis on software and hardware level, threat analysis, developing recommendation and security environment for data loss prevention.
